

Mechanical Grab

Presented as two different types as being MGK and MGU. Provided that the main chassis will be stable, it enables to make excavation with different sizes by replacing the jaws and guides. Jaws can be selected as two different types as being flat and round. All the pulleys are manufactured by maintenance free durable life-time felts and bearing systems. Surfaces exposed to abrasion are manufactured by Hardox 500 material. Chassis and arms that require endurance are manufactured by Weldox 700 material. Guides and holders are manufactured by S 355 material. There are two different types of each model as short and long.

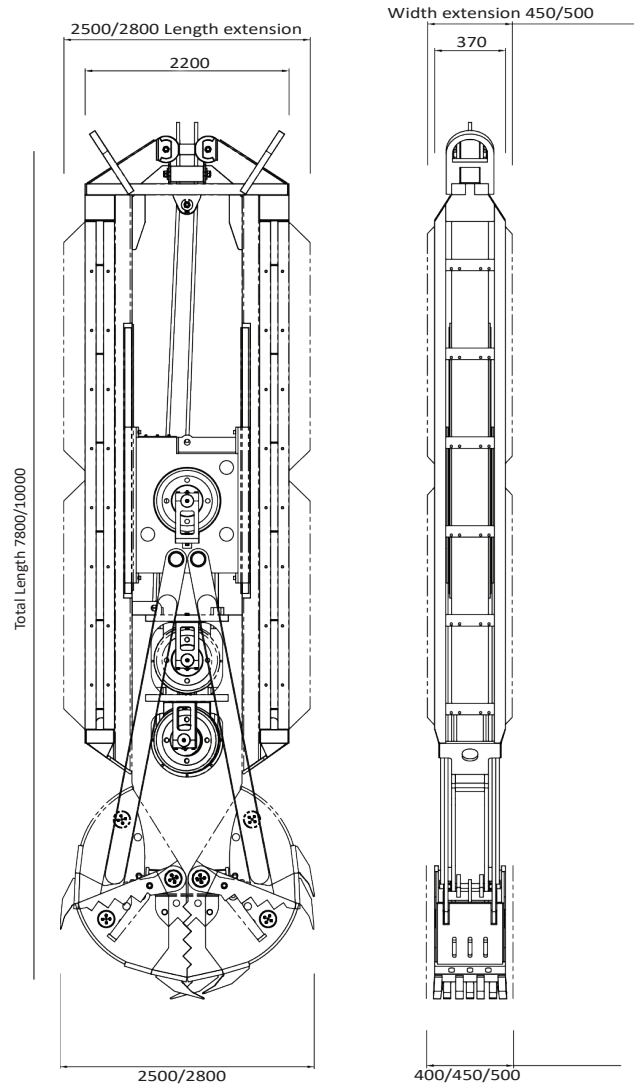

MGK ve MGU olmak üzere iki farklı tipte sunulmuştur. Ana şase sabit kalmak koşuluyla çene ve klavuz değiştirilerek farklı ölçülerde kazı yapma imkanı sağlar. Çeneler düz ve yuvarlak olarak iki farklı tipte seçilebilmektedir. Tüm makaralar bakım gerektirmeyen ve uzun ömür sağlayan life-time keçeler ve rulmanlı sistemle üretilmiştir. Aşınmaya maruz yüzeyler Hardox 500 malzemeden imal edilmiştir. Mukavemet gerektiren şase ve kollar weldox 700 malzemeden üretilmiştir. Klavuz ve tutucular S 355 malzemeden üretilmiştir. Kısa ve uzun olmak üzere her modelin 2 farklı tipi vardır.
